The UF Health Craniofacial Center is dedicated to the care of individuals with cleft palate and other craniofacial conditions. Our interdisciplinary team approach consists of many specialists working together to provide high-quality, integrated care. Our team consists of health professionals from pediatrics, surgery, clinical psychology, speech-language pathology, otolaryngology, audiology, nursing, oral and maxillofacial surgery, social work, pediatric dentistry and orthodontics. Other specialists are available for consultation, including those from genetics, neurosurgery, ophthalmology and education.
