UF | College of Pharmacy
UNIVERSITY of FLORIDA

William H. Riffe, Ph.D.
Dean, College of Pharmacy

3 Education

degree programs

The University of Florida College of Pharmacy promotes the health and welfare of the citizens of Florida and the nation by preparing graduates in Pharmacy to take independent professional responsibility for the outcome of drug therapy in patients.

4

campus locations

Doctor of Pharmacy graduates have the scientific and cultural background necessary to assume leadership roles in the profession and the community.

1,470

Pharm.D. students

The Entry-level Pharm.D. program is available on the four campuses for the UF College of Pharmacy: Gainesville, Jacksonville, Orlando, St. Petersburg.

568

M.S. / Ph.D. students

Our graduate and postgraduate education prepares students to assume quality positions in academia, government and the pharmaceutical industry, with an ability to compete for the best positions. The college fosters high-quality research in many disciplines, including medicinal chemistry, pharmaceutical outcomes and policy, pharmaceuticals, pharmacodynamics, and pharmacotherapy and translational research.

Research

Research activities in the UF College of Pharmacy span a broad range of interests and expertise, including drug discovery, pharmacometrics and systems pharmacology, personalized medicine, marine natural products, metabolic effects of pollutants, herbal medicine, medication therapy management, asthma, diabetes, anemia, addiction, glaucoma, community health programs, pharmacoepidemiology, hospital and patient safety, and treatments for cancer, cardiovascular and neurodegenerative diseases.

The UF College of Pharmacy joins the University of Florida Research and Academic Center in Orlando at Lake Nona

International symposia held biennially since 1997 allow scientists, educators and students in these research disciplines to meet and share their work:

- Retrometabolism-based Drug Design
- Clinical Pharmacy and Clinical Pharmacology

Online Interdisciplinary Graduate Programs

Since its inception in 1923, the UF Master of Science in Pharmacy degree program has stood for excellence, leading the way in academic innovation. In 2000, the college began developing unique master's programs utilizing distance learning technologies. Today, working professionals everywhere can access high-quality education and credentials in a wide variety of pharmacy disciplines. Our graduate programs include forensic sciences, pharmaceutical chemistry, clinical toxicology, areas of pharmacy regulation and policy, medication therapy management, and clinical pharmacy for international pharmacists.

490
Working Professional Pharm.D. students

National Reach

Established in 1994, the University of Florida's Working Professional Doctor of Pharmacy program is one of the most established non-traditional Pharm.D. programs. The WPPD program is specifically for individuals who are already licensed pharmacists in the United States or Canada looking to stay relevant and expand their career potential. This innovative and flexible program helps create expert clinicians versed in the safe and effective use and distribution of medications to patients. More than 2,000 working professional, licensed pharmacists across North America have become UF graduates by earning a Doctor of Pharmacy degree.
