UF Health Shands Children's Hospital is the premier academic children's hospital in North Central Florida. As a recognized leader in pediatric medicine, it serves as a major destination for children worldwide with complex medical issues requiring specialized attention. The dynamic University of Florida Health faculty is devoted to the best in patient care, research and education.

The UF Health Shands Pediatric E.R. and UF Health Pediatrics After Hours services also provide families with a convenient, one-stop children's health center for urgent after-hours and emergency care. Social Work, Child Life and Arts in Medicine programs offer a variety of services to patients and families to minimize the stress and anxiety associated with hospital visits.

In 2015, UF Health Shands Children’s Hospital was awarded the Baby-Friendly designation by Baby-Friendly USA, a global initiative of the World Health Organization and UNICEF that recognizes birthing facilities that implement policies known to improve breastfeeding outcomes for infants and mothers, known as the 10 Steps to Successful Breastfeeding. Our practices have prioritized the unique needs of breastfeeding families so that services can be offered in the medical home and also as outreach to families who see other providers.

UF Health Shands Children's Hospital has 208 licensed beds, and we continue to expand our services and improve our facilities to meet the needs of our pediatric patient population.

UF Health Shands Children's Hospital is part of the Children's Miracle Network’s alliance of premier hospitals for children. It is also a member of the Children's Hospital Association, which champions public policies that enable hospitals to better serve children.
